DAS-7008/9

“Beep & Display” Handheld Reader

Physically, the DAS-7008/9 series are our smallest readers but they perform like giants. These compact and rugged instruments provide great read distance, long-lasting power, and long-lived durability. Previous technologies in this class cannot compete; the DAS-7008/9 raises the bar. These portable units easily slip into lab coat pockets and offer a perfect solution for startup or smaller projects where this simple system and a case of transponders are all it takes. Existing 6000 and 7000 series customers will also appreciate this unit for quick inventory checks. Packaged in a heavy-duty polycarbonate body and featuring special non-ferrite circular scan heads, these unique easy-to-use units quickly locate transponders, and the backlit graphic display makes ID data and status easy to read in all lighting conditions.

Full functionality is at your fingertips through an easy cleaning membrane keypad and five simple buttons: Scan, Menu, Enter, Up Arrow, and Down Arrow. The menu screen enables users to set various display modes and scrolling options, select repeat options, set scanning modes, auto shut off modes, or to disable the loud internal beeper. These five simple buttons and menu screen offer surprising flexibility, including writing, editing, and locking IPT or IPTT transponder data with the DAS-7009.

With models for each BMDs transponder type, simply match the applicable reader to the transponder in your study: Use the DAS-7008 with the standard (IMI) Implantable Micro Identification transponder, and the DAS-7009 with the read/write Implantable Programmable Temperature Transponder (IPTT), or the non-temperature sensitive Implantable Programmable Transponder (IPT).

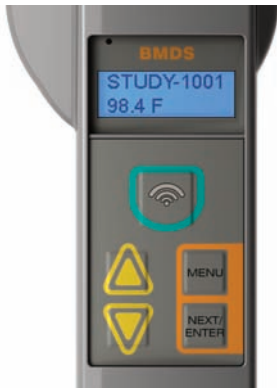

Features & Benefits

- Compact, easy portability
- High performance/Cost efficient
- Impact resistant plastic case
- Multifunction graphic display
- Plastic shield protects the display screen & enhances visibility
- Angled reader head enhances aim & scan accuracy
- Auto Scan Mode automatically scans every 2-3 seconds
- Manual Scan Mode scans only when Scan button is pressed
- 6-AAA rechargeable NiMH batteries & plug-in connector included
- Rounded edges and gently curved handle contour add user comfort
